

**WE WILL BRING DOWN THE PATRIARCHY AND THE STATE THAT CONDEMNS US TO VIOLENCE  
ON NOVEMBER 25TH WE ARE ON THE STREETS!**

While wars all over the world are claiming the lives of tens of thousands of people, the danger of a new world war is growing rapidly. We welcome "November 25, International Day for the Elimination of Violence against Women" at a time when the lives of the peoples of the world, especially women and children, are made more difficult every day, and all forms of violence are becoming more and present in our lives.

**Racist Policies are Produced through Women;**

Fascist-racist parties such as AfD, which are on the rise in Europe today, produce their anti-immigrant-refugee, racist policies through the female body, while blending and distorting them with the current problems of society and trying to gain a base.

In reality, they are planning to redesign the social lives of women, whom they see as incubators and want to pull out of the production areas and lock them at home, through the 3K policies of Hitler and Mussolini.

In this way, they want to make women the bearers of racist policies and dependent on men, to distance them from social struggle, to turn them into submissive beings. They know that it is easy to control a society whose women are subjugated. On the other hand, with this policy, they want to weaken and cripple the social struggle by cutting off a very important pillar of the opposition movement

**The Right to Abortion is Being Usurped;**

All fascist-racist parties, especially the Pope and the Churches, define abortion as "**murder**" and doctors who perform abortions as "**murderers for hire**". By attacking the "**RIGHT TO ABORTION**", which is the achievement of more than a hundred years of struggles, they are trying to ignore the women's struggle while forcing women to give birth to cheap labor and soldiers who take and give life in wars.

**Equal Pay for Equal Work**

As the purchasing power of the peoples worsens every day, it would not be wrong to say that the gap in wage inequality will widen further and women's poverty will increase, since women will be the first to be hit by layoffs in production areas, especially in the automotive industry in Germany. For migrant women workers and laborers, inequality on this front has always been much

greater.

The armament budgets, which are constantly increased for imperialist wars, are provided by cutting the wages of workers and laborers through taxes, from the budgets allocated for the vital needs of the people such as health, education, pensions, unemployment.

**Violence against Women on the Rise**

In this period when the danger of the 3rd Imperialist War of Sharing is on the rise, murders of women and children are on the rise worldwide. According to the UN report, In 2022, approximately 48,800 women and girls were killed by their husbands or the men closest to them. In Germany, the number of femicides was 113 in 2021, 163 in 2023 and 146 in the first 10 months of 2024. Data showing that 134 women were murdered in France, 109 in Italy, 28 in Austria and 17 in Switzerland show the rise in femicides. We know that this data is only the tip of the iceberg.

**Rapes are Weapons of Imperialist War**

The traumas resulting from torture against women such as harassment, rape and the commodification of women's bodies, which are used as weapons of war, are passed down from generation to generation for years after the war.

It is during these times that child pornography and organ mafias steal the lives of our children the most.

**Let's Strengthen the Front of Struggle;**

This year, on November 25th, we must take to the streets together, native and immigrant women alike, to strengthen the international women's struggle and to shout our slogans more loudly. While wars are inevitable as long as imperialism exists, the only power that can prevent it is the struggle of the peoples of the world. Therefore, we must be strong subjects of the struggle against imperialism and war.

This year, we will fill the fields not with our victimizations, but with the revolutionary resilience of the women who overthrew the Russian Tsar in February 1917, and the Mirabel sisters, who overthrew the Dominican dictator in 1960.

**Long Live Our International Women's Struggle!**
